BEGONIA HULA BLUSH

- **Scientific Name:** Begonia x hybrida
- **Habits:** Spreading
- **Height:** 15cm - 25cm
- **Spacing:** 30cm - 50cm
- **Width:** 50cm - 70cm
- **Exposure:** Part Sun | Shade | Sun
- Hula is a unique spreading type of begonia that is highly branched with lots of small flowers
- Its trailing habit is perfect for baskets and containers
- Provides an instant performance advantage for landscapers, with masses of flowers showing on top
- The series is daylength neutral and it is the earliest interspecific begonia to flower, with timing similar to BabyWing
- Small flowers compared to Megawatt or Dragon Wing, but with the high number of flowers, it has great colour impact
- Hula starts to spread at an early stage, and along with early flowering, it provides growers with a high-quality, attractive, salable plant that is covered with blooms at retail, in both hanging baskets and smaller pot sizes

[view product page](#)

BEGONIA HULA PINK
