Irrigation specification - Remove from mist as soon as possible

Apply broad spectrum fungicide the day of sticking to control leaf disease. For the more vigorous varieties, apply Daminozide spray at 1500 ppm week 3.

- <u>PGR</u> Spray Daminozide at 1500 to 2500 ppm on young finished plants Paclobutrazol drench application at 1 ppm for finishing if required for the more vigorous varieties
- <u>Maintain good airflow</u> and allow plants to dry before nightfall. Drench for protection against Rhizoctonia after transplant and again during finishing stage.
- · Scout for Aphids & Thrip on regular basis
