## **Tourmaline Bush Mandevilla**

The Tourmaline Series is a part of the Diamantina™ Collection of genetic varieties bred by mandevilla and dipladenia expert Lannes of France. Bold and beautiful mandevilla blooms with a unique nonvining habit. This opens up the option to grow in gardens, smaller containers, patio pots and mixed combinations. Although a trellis is not necessary, a support can be used to encourage climbing. A great new option for mandevilla programs! Blooms are a lovely light pink!
